Description this book

Presented in 1954 as an experiment conceived by Willys Overland of Brazil and named after one of the most traditional Brazilian slang for devil, Capeta may be regarded as the first Brazilian concept car under the perspective of pioneering stylistic and technical features for probable forthcoming models of an already established manufacturer. As a highly attractive two-seater coupé, Capeta had its only brief auction especially during the 4th S&C&P Paulist Auto Show after meeting an unforeseen positive reaction by general public opinion. Even though discontinued for series production regarding the country's unstable market for an expensive sports model and built as a single prototype, Capeta indeed became a quickly earned trophy for conceiving its own cars. This article encompasses for the first time the complete profile and history of one of the most enigmatic relics of Brazilian automotive history.
